FOR IMMEDIATE RELEASE

Caldwell Medical Center Designated As Regional Vaccination Site

PRINCETON, KY: (February 17, 2021) Caldwell Medical Center has been designated as a regional vaccination site and will begin administering the Moderna COVID-19 vaccine on Thursdays, starting on February 25th, 2021 from 7:30 a.m. to 10:30 a.m.

This vaccination clinic is for residents of the Commonwealth of Kentucky able to demonstrate residency and who are eligible under each phase of the state's vaccine distribution plan. We are currently seeing Phase 1A- Healthcare workers and Phase 1B- 70+ years old, first responders, and K-12 school personnel. As each phase of distribution is completed, we will then move into Phase 1C- Anyone over the age of 60, anyone older than 18 with CDC highest risk for COVID-19 risk conditions, and ask that you call to get on our waiting list. If you have already called and have been placed on our waiting list, you do not need to call again as we will reach out to you. When the vaccine is available and appropriate based on state guidelines, you will be contacted to schedule an appointment.

Patients interested in receiving the vaccine at Caldwell Medical Center vaccination site, should call **270-365-0428** to schedule an appointment and for more information. Walk-in appointments will not be accepted. Please note that appointments may change based on vaccine availability. We ask for patience as we move through administering vaccines to meet the demand. Hospital vaccine allocations are determined by state and federal guidance.
